

WinDBG (Preview)

```
lm
? @$exentry
bp @$exentry
```

Make sure if you have the correct breakpoint address

issue lm an exe without symbol will be shown as

```
0:000> lm
start      end          module name
00400000 0040f000  image00400000 (no symbols)
compare the NtHeader->AddressssOfEntrypoint with @$exentry

0:000> r $t0 = image00400000
0:000> ?? ((ntdll!_IMAGE_NT_HEADERS *) @@( poi( @$t0 + 0x3c ) + @$t0
))->OptionalHeader.AddressOfEntryPoint + @$t0
unsigned int64 0x401280
0:000> ? @$exentry
Evaluate expression: 4199040 = 00401280
```
