

Unix Artefacts Collector

<https://github.com/tclahr/uac> <https://tclahr.github.io/uac-docs/>

Collect all artifacts based on the `ir_triage` profile, and save the output file to `/tmp`.

```
./uac -p ir_triage /tmp
```

Collect all artifacts located in the `artifacts/live_response` directory, and save the output file to `/tmp`.

```
./uac -a ./artifacts/live_response/\* /tmp
```

Collect all artifacts based on the `ir_triage` profile, along with all artifacts located in the `/my_custom_artifacts` directory, and save the output file to `/mnt/sda1`.

```
./uac -p ir_triage -a /my_custom_artifacts/\* /mnt/sda1
```

Collect a memory dump and all artifacts based on the full profile.

```
./uac -a ./artifacts/memory_dump/avml.yaml -p full /tmp
```

Collect all artifacts based on the `ir_triage` profile excluding the `bodyfile.yaml` artifact.
